Response to Amendment

The following is in response to the amendment filed on September 27, 2006.

Allowable Subject Matter

Claims 1-11 are allowed.

The following is an examiner's statement of reasons for allowance:

The claims are allowed for at least reciting the combination of features, including the arrangement of the swing arm and auxiliary arm, and providing an articulated connector between the swing arm and the auxiliary arm in a manner that allows axial movement of the swing arm relative to the auxiliary arm without radial distortion of the swing arm as forces are transmitted thereto. The prior art does not disclose or suggest such a feature for a beam in a paper machine.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Response to Arguments

Applicant's arguments filed September 27, 2006 have been fully considered.

Applicant's arguments and amendment to the claims have overcome the rejections set forth previously under 35 U.S.C. 103(a) over Wohrle (US 4,637,338) and over Halmschlager (US 5,868,841). The claims now clearly define the present invention over the devices disclosed in the applied references.

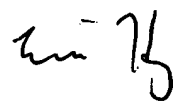

The objection to claims 4-7 as being in improper multiple dependent form has been overcome by amendment to claim 4.
